**SESSION DESCRIPTION:**
Cloud computing is a new alternative of scalable and cost efficient computing which is accepted worldwide. But there lie various open issues line issues with increasing infrastructure which are geographically located and performance issues. Moreover faults in datacenter with are occurring at random point degrades the performance and reliability in cloud environment. So this issue aims to find and invite new research from the field of fault tolerant and reliable computing.

The Objective of this special issue to collect quality work from the field of cloud computing to address various issues concerned to improve the performance in cloud environment. The topic of interest those are not limited to the list given below:

**RECOMMENDED TOPICS:**
- Scalability in cloud
- Power efficient computing
- Heuristic based algorithm in cloud
- Reliability in cloud
- Cloud computing architectures and systems
- Hybrid cloud environment
- Datacenter networking
- Trust, security and privacy
- Cloud resource management
- Fault tolerance and reliability of Big Data Systems
