SESSION DESCRIPTION:
In this special session, experts in the field of artificial intelligence and education will come together to discuss the latest developments and cutting-edge applications of large language models and other AI techniques in education and beyond. Participants will gain a comprehensive understanding of how these models can be leveraged to improve education outcomes, as well as their potential impact on other industries.
Speakers will present case studies and real-world examples of how Artificial Intelligence has and could be applied in educational settings to improve student outcomes and support learning. The session will also delve into the ethical and societal implications of these models, including considerations around bias and fairness.

RECOMMENDED TOPICS:
Topics to be discussed in this special session include (but are not limited to) the following:

- **Large Language models**
- **AI Applications for Education and E-learning**
- **AI Applications for Cyber Security and Forensics**
- **AI Applications for Healthcare**
- **AI Applications for Business Intelligence**
- **Legal and Ethical Implications on the application of AI**

Researchers and practitioners are invited to submit papers for this special theme session on **Applications of Artificial Intelligence in Education and Beyond** *on or before* **[insert due date]**. All submissions must be original and may not be under review by another publication.
